

Transform the Way You Use Information to Build Your Business

An Introduction to Business Intelligence Solutions for Midsize Companies :

Transform the Way You Use Information to Build Your Business

In today's volatile economy, you need solutions that can deliver the insight you need to understand your data, and use it to make better decisions. At the same time, you need functionality that can streamline your business processes and help you manage your enterprise – so you can focus on sustainable growth.

Midsize companies that want to improve business processes, discover new opportunities, and gain a competitive advantage need to look into business intelligence solutions. SAP BusinessObjects Edge Business Intelligence (BI) is a powerful business intelligence specifically designed for this market. This comprehensive, versatile midmarket software delivers solutions that address any business intelligence requirement – from flexible ad hoc reporting and analysis, to dashboards and visualization, to powerful data integration and quality as well as prepackaged data mart solutions.

SAP BusinessObjects Edge BI brings together the simplicity and speed of search with the trust and analytical power of BI to provide immediate answers to your business questions. Your users can leverage familiar keyword searches to find information hidden in data sources, then navigate and explore directly on data – without the need for existing reports or metrics.

Attend this seminar organised by SAP and Metrodata to learn how you , too, can tranform your organization with this buisness intelligence solution.
