Acceptance

Post  
Migration

Evaluate your Windows environment to reduce costs and optimize compute.

- AWS supports everything you need to build and run Windows workloads applications including Active Directory, .NET, Microsoft SQL Server, Windows desktop-as-a-service, and all supported versions of Windows Server.
- In collaboration between AWS and Metrodata's expert team, we can help to deliver the best solution and offer better price-performance to AWS customer's, especially on Windows workloads by leverage an assessment using Optimization and Licensing Assessment (OLA) Framework, to make migration decisions for Windows workloads based on actual resource utilization.
- **FREE** Windows Assessment by Metrodata's AWS Team, Reserve yours today!

Name your Workload Type:

- Web Server
- Database Server
- Microsoft SQL Server (license purchased via AWS)
