

MTDL Optimis Tumbuh Melebihi Target

Penjualan MTDL Bertumbuh 20,9% pada Kuartal III-2021

Jakarta, 28 Oktober 2021 - PT Metrodata Electronics Tbk ("MTDL"), emiten Teknologi Informasi dan Komunikasi ("TIK") khususnya di bidang solusi digital serta distribusi hardware dan software, optimis dapat bertumbuh melebihi target di akhir tahun 2021. MTDL berhasil mencatatkan kinerja positif pada Kuartal III-2021 dengan membukukan penjualan sebesar Rp12,1 triliun atau meningkat 20,9% dibandingkan periode yang sama pada tahun sebelumnya. Pencapaian ini berhasil diraih di tengah ketatnya kebijakan Pemberlakuan Pembatasan Kegiatan Masyarakat (PPKM) yang diberlakukan pemerintah dalam upaya mengurangi penyebaran Covid-19.

Susanto Djaja selaku **Presiden Direktur MTDL** mengatakan, "Pencapaian penjualan ini tidak terlepas dari kontribusi kedua unit bisnis MTDL, yaitu unit bisnis Distribusi dan unit bisnis Solusi & Konsultasi. Unit bisnis Distribusi mengalami banyak permintaan akan kebutuhan produk TIK di tengah pandemi. Di sisi lain, unit bisnis Solusi & Konsultasi meskipun mengalami cukup banyak tantangan dalam menyelesaikan proyek kepada pelanggan karena banyaknya karyawan pelanggan yang terkena dampak pandemi, namun hal ini dapat diatasi secara bertahap. Untuk itu, MTDL optimis dapat bertumbuh melebihi

MTDL Optimistic to Grow Beyond Target

MTDL Revenue Grew by 20.9% in the Third Quarter of 2021

Jakarta, October 28, 2021 - PT Metrodata Electronics Tbk ('MTDL'), an Information and Communication Technology ("ICT") issuer in the field of digital solutions and hardware and software distribution, is optimistic that it can grow beyond its target by the end of 2021. MTDL succeeded in recording positive performance in the Third Quarter of 2021 by posting revenue of IDR12.1 trillion, an increase of 20.9% compared to the same period in the previous year. This achievement was accomplished despite the government's strict policy of implementing Community Activity Restrictions (PPKM) in an effort to reduce the spread of Covid-19.

Susanto Djaja as the President Director of MTDL said, "This revenue achievement would not have been possible without the contribution of the two MTDL business units, the Distribution business unit and the Solutions & Consulting business unit. The Distribution business unit experienced a lot of demand for ICT products in the midst of a pandemic. On the other hand, the Solutions & Consulting business unit still managed to overcome the sizable number of challenges it experienced in completing projects to customers due to the large number of customer employees affected by the pandemic. For this reason, MTDL is

target pada tahun 2021 ini, di atas target yang sebelumnya ditetapkan pada akhir tahun 2020 sebesar 10%.”

Kontribusi pertumbuhan penjualan di unit bisnis Distribusi didukung oleh diversifikasi produk terutama *Chromebook* dan produk *gaming*. Walaupun sempat terjadi kelangkaan produk TIK di Kuartal III-2021, MTDL berhasil membukukan kinerja penjualan yang baik. Salah satu upayanya adalah melakukan diversifikasi produk *Notebook* dan PC yang ketersediaannya cukup terbatas, yaitu dengan memasarkan produk *Chromebook* dan menjalankan *partnership* bersama *brand* baru.

Pada unit bisnis Solusi & Konsultasi, penjualan salah satunya dikontribusikan oleh penyediaan produk dan implementasi untuk mendukung pelaksanaan proyek KOMI (Konverter BI-FAST System MII). Lalu, performa penjualan *Cloud* dan solusi lainnya dari delapan pilar solusi digital MTDL, yaitu *Cloud Services*, *Big Data & Analytics*, *IT Security*, *Hybrid IT Infrastructure*, *Business Application*, *Digital Business Platform*, *Consulting & Advisory Services*, dan *Managed Services* juga secara umum meningkat di tengah pandemi.

“Selain pencapaian penjualan yang baik, pada Kuartal III-2021 MTDL membukukan laba bersih sebesar Rp351,4 miliar atau meningkat 31,3% dibandingkan dengan periode yang sama pada tahun sebelumnya. Kontribusi laba bersih pada unit bisnis Distribusi juga meningkat 44,4%, dan unit

optimistic that it can grow beyond the target in 2021, above the target previously set at the end of 2020 of 10%.”

Revenue growth contribution in the Distribution business unit was supported by product diversification, especially Chromebooks and gaming products. Although there was a shortage of ICT products in the Third Quarter of 2021, MTDL managed to record a good revenue performance. One of the efforts is to diversify Notebook and PC products which their availability are being quite limited, by marketing Chromebook products and running partnerships with new brands.

In the Solutions & Consulting business unit, revenue were contributed by product provision and implementation to support the implementation of the KOMI (BI-FAST System MII Converter) project. Then, the revenue performance of Cloud and other solutions from the eight pillars of MTDL digital solutions, namely Cloud Services, Big Data & Analytics, IT Security, Hybrid IT Infrastructure, Business Application, Digital Business Platform, Consulting & Advisory Services, and Managed Services also generally increased in the midst of a pandemic.

“In addition to achieving good revenue, in the Third Quarter of 2021 MTDL posted a net profit of IDR351.4 billion or an increase of 31.3% compared to the same period in the previous year. The net profit contribution to the Distribution business unit also increased by 44.4%, and the Solutions & Consulting

bisnis Solusi & Konsultasi meningkat 19,9%. MTDL telah dilengkapi dengan infrastruktur TIK yang komprehensif sehingga dapat mendukung kinerja kami meski di tengah adanya kebijakan PPKM. Berbagai proses seperti pemesanan dan pengiriman produk dapat dilakukan secara *seamless* karena infrastruktur yang memungkinkan proses kerja secara *remote*,” ungkap **Randy Kartadinata** selaku **Direktur MTDL**.

Sebagai informasi, pada Kuartal III-2021 MTDL melakukan investasi pada *venture capital* dan *matured start-up company* yang bergerak di bidang e-groceries. Ke depan MTDL akan terus melakukan investasi pada bisnis yang memiliki *platform* digital dalam rangka memperkuat ekosistem digital di Indonesia. “MTDL juga optimis akan mencapai pertumbuhan *double digit* untuk penjualan dan laba bersih di tahun 2021, mengingat akselerasi transformasi digital yang dipercepat oleh pandemi akan terus berlanjut sebagai bagian dari era *new normal*,” tutup **Susanto**.

Tentang PT Metrodata Electronics Tbk
